CONTENTS

Vol. 61, Issue Nos. 171–172

Journal of Polymer Science

ISSUE NO. 171, SEPTEMBER

HERBERT N. FRIEDLANDER: Introduction 1

LUIGI BOGHETICH, GEORGE A. MORTIMER, and GREG W. DAUES: Free-Radical Copolymerization of α-Olefins with Ethylene 3

GEORGE E. HAM: Tacticity as a Problem in Copolymerization: Influence of Neighboring Units on Reactivity of Growing Chains ... 9

K. F. O'DRISCOLL and IRVING KUNTZ: Kinetics of Anionic Copolymerization of Monomers of Similar Polarities 19

MAURICE MORTON and F. R. ELLS: Absolute in Anionic Copolymerization 25

J. SMID and M. SZWARC: Kinetics of Anionic Copolymerization. Determination of Absolute Rate Constants 31

W. E. SMITH, R. L. STOFFER, and R. B. HANNAN: Analysis and Properties of Ethylene–Propylene Copolymers 39

G. W. PHILLIPS and W. L. CARRICK: Transition Metal Catalysts. IX. Random Ethylene-Propylene Copolymers with a Low Pressure Polymerization Catalyst 45

BACON KE: Differential Thermal Analysis of High Polymers. V. Ethylene Copolymers 47

E. G. KONTOS and W. P. SLICHTER: Relaxation Phenomena in Homopolymers and Copolymers of Ethylene and Propylene 61

E. G. KONTOS, E. K. EASTERBROOK, and R. D. GILBERT: Block Copolymers of α-Olefins Prepared from Macromolecules with Long Chain Lifetimes 69

G. NATTA and G. CRESPI: Properties of Ethylene–Propylene Copolymers and of Terpolymers Containing Unsaturation 83

I. A. TUTORSKIĬ, Z. I. SMELYĬ, and V. M. BYSTROV: Interaction of Carboxyl-Containing Butadiene–Styrene Rubbers with Polyamides and ϵ-Caprolactam 97

V. D. GUPTA: An Expression for Orientation in Cellulose Fibers 107

D. H. NAPPER and A. G. PARTS: Polymerization of Vinyl Acetate in Aqueous Media. Part I. The Kinetic Behavior in the Absence of Added Stabilizing Agents 113

D. H. NAPPER and A. E. ALEXANDER: Polymerization of Vinyl Acetate in Aqueous Media. Part II. The Kinetic Behavior in the Presence of Low Concentrations of Added Soaps 127

CHARLES C. PRICE and NAN SHIEH CHU: Polyethers. XIII. The Effects of Catalyst Concentration and Oxygen on the Polymerization of 4-Halo-2,6-dimethylphenol 135
EMORY BRASWELL, ALBERT GOODMAN, and KURT G. STERN: Studies on the Enzymatic Synthesis of Dextran. Part II 143
A. REMBAUM, F. R. ELLIS, R. C. MORROW, and A. V. TOBOLSKY: Some Results of Cesium-Initiated Diene Polymerization and Copolymerization 155
R.-J. ROE and W. R. KRIGBAUM: The Contribution of Internal Energy to the Elastic Force of Natural Rubber 167
A. RAVVE and J. T. KHAMIS: Studies on Grafting Glycidyl Methacrylate on Polyvinyl Chloride Backbones 185
BERNHARD WUNDERLICH and PETER SULLIVAN: Solution-Grown Polyethylene Dendrites 195
STEWART H. MERRILL: The Hypochlorite Oxidation of Polyvinylacetophenone 223
I. MLADENOV, I. A. TUTORSKIĬ and B. A. DOGADKIN: Reactions of Carboxylated Butadiene–Styrene Rubbers and Their Mixtures with ϵ-Caprolactam Induced by γ-Radiation 235
F. J. WELCH: Polymerization of Methyl Methacrylate by Triethylboron-Oxygen Mixtures 243

LETTERS TO THE EDITORS

NISHIO HIRAI, HIROYUKI KISO, and TAKESHI YASUI: Morphology of Torn Polyethylene Crystals S1
KENNETH F. O'DRISCOLL: On Dead-End Polymerization S4
K. L. GRAY and R. W. YORKE: Gel Particles and Effect on the Tensile Properties of High Tenacity Viscose Fibers S5
MOTOWO TAKAYANAGI, MASATSUGU YOSHINO, and SHUNSUKE MINAMI: State of Crystallization of Polyethylene Terephthalate Determined by the Viscoelastic Absorptions S7

NOTES

HELMUT RINGSDORF and C. G. OVERBERGER: Preparation and Intra-Intermolecular Polymerization of *S,S'*-Divinylmercaptals S11
RIICHIRÔ CHÛJÔ, SHIROH SATOH, TOSHIO OZEKI, and EIICHI NAGAI: High Resolution NMR Spectra of Polyvinyl Chloride, and Vinyl Chloride–Vinylidene Chloride Copolymer S12
AKIRA YAMADA, MASAYA YANAGITA, and EIICHI KOBAYASHI: Stereoregular Polycycloolefins S14
V. L. FOLT, J. J. SHIPMAN, and S. KRIMM: Characterization of Tacticity in High Polymers S17
MASAYA YANAGITA, AKIRA YAMADA, and YOSIO YAMAMURO: X-Ray Diagram of Crystalline Polystyrene Grown on Nata Catalyst, α-$TiCl_3$ and $AlEt_3$ S20

A. V. Tobolsky, D. W. Carlson, N. Indictor, and M. C. Shen: Further Results Concerning Rubber Elasticity and Chain Configuration S23
A. M. Kotliar: The Change in the Intrinsic Viscosity with Random Chain Scission. I. Narrow Initial Molecular Weight Distributions S25
Walter A. Butte, Charles C. Price, and Robert E. Hughes: Crystalline Poly(2,6-Xylenol) S28
K. S. Chan, G. Rånby, H. Brumberger, and A. Odajima: NMR Measurements on Isotactic Poly(4-Methyl-1-Pentane) S29
Atsuo Nishioka, Yoshinori Kato, Takashi Uetake, and Haruaki Watanabe: Motional Narrowing of Some Stereoregular Polymethyl Methacrylates S32

ERRATUM

Richard H. Wiley and Burns Davis: Tracer Techniques for the Determination of Monomer Reactivity Ratios. III. Ionization Chamber Assay and the React v ty Ratio: for the Styrene 1-*p*-Methylstyrene Copolymerization (article in *J. Polymer Sci.*, **46**, 423–429, 1960) S33

Issue No. 172, October

EDITORIAL

R. Meredith and Bay-Sung Hsu: Stress Relaxation in Nylon and Terylene: Influence of Strain, Temperature, and Humidity 253

SUBJECT INDEX, VOLUME 61

Acrylamide, resonance studies, 333
Amorphous selenium, viscoelastic properties, 483
Anionic copolymerization of monomers of similar polarities, 19
  absolute rates, 25
  absolute rate constants, 31
Aromatic polyamide, S49
Broadline NMR spectra, of polytetrafluoroethylene, 403
Butadiene popcornpolymer, oxidation, 475
Butadiene-styrene rubbers with polyamides and ϵ-caprolactam, 97
  reactions with ϵ-caprolactam, 235
Catalyst concentration and oxygen, effects on polymerization of 4-halo-2,6-dimethylphenol, 135
Cellulose fibers, expression for orientation, 107
Cesium initiated diene polymerization, 155
Chain configuration, S23
Copolymerization, free radical of α-olefins, 3
  tacticity, influence of neighboring units, 9
Crotonaldehyde polymerization, S37
Crystalline polyethylene, irradiation, 463
Dead-end polymerization, S4
Dextran, enzymatic synthesis, 143
Diene polymerization and copolymerization, cesium-initiated, 155
Divinyl mercaptals, preparation, intra.-intermolecular polymerization, S11
Elastic force, contribution of internal energy, 167
Electron spin resonance studies, of acrylamide and methacrylamide, 333
Ethylene copolymers, thermal analysis of high polymers, 47
Ethylene-propylene copolymers, analysis and properties, 39
  and homopolymers, relaxation phenomena, 61
  and properties of terepolymers, S3
  random, with a low pressure polymerization catalyst, 45
Fibers, dynamic bending properties, 271
Fluorinated polymers, differential thermal analysis, S41
Gel particles, effect of tensile properties, S5
Glycidyl methylacrylate, grafting on polyvinyl chloride, 185
Graft copolymers, synthesis by transesterification method, 497
High Polymers differential thermal analysis of, 47
  characterization of tacticity, S17
Infrared spectra, of Limmonia accidissmic acid, S58
  of polymers, S45
Internal energy, contribution to elastic force, 167
Isotactic poly(4-methyl-1-pentane), NMR measurements, S29
Kinetics, crystallization, 343
Limmonia accidissmic acid, infrared spectra of, S58
Magnetic anisotropy effects, in broadline NMR spectra, 403
Methacrylamide, resonance studies, 333
Methyl methacrylate, polymerization of triethylboron-oxygen mixtures, 243
Molecular weight, initial distribution, S25
Nata catalyst, polystyrene crystalline growth, S20
NMR spectra, high resolution, of chloride polymers, S12
  measurements on isotactic poly(4-methyl-1-pentane), S29
Nylon, stress relation, 253
Nylon 66, effect of temperature, 271
α-Olefins, block copolymers, preparation, 69
  free radical copolymerization, 3
Orlon, effect of temperature, 271

Photochemical studies, of ultraviolet absorbers, 361
Polyalloociniene, 311
Poly (bicyclo 2.2.1 heptadiene-2,5), S38
Poly-3,3-bis(chloromethyl)oxacyclobutane, crystallization kinetics, 343
Poly(bisphenol-A carbonate), crystal structure, S40
Polycycloolefins, stereoregular, S14
Polyethers, 135
Polyethylene crystals, torn, morphology, S1
dendrites, solution grown, 195
terephthalate, state of crystallization, S7
Polymer, fractionation data, 449
Polymers, crystalline and stereoregular, S45
crystallized in bulk, 381
flow of dilute solutions and of nondilute liquid, 413
Polymethyl methacrylates, stereoregular, motional narrowing, S32
Polystyrene, crystalline, x-ray diagram, S20
Polytetrafluoroethylene, magnetic anisotropy effects, 403
Polyvinylacetophenone, hypochlorite oxidation, 223
Polyvinyl chloride stabilizers, mechanism of synergistic effect, S60
Poly(2,6-xylenol), crystalline, S28
Popcorn polymerization, infrared studies, 475
Protective ultraviolet absorbers, in a space environment, 361
Radical polymerization, inhibition in liquid sulfur dioxide, S54
Random chain scission, change in intrinsic velocity, S25
Regularly alternating polyesteramides, preparation, 353
Relaxation phenomena, ethylene and propylene homopolymers and copolymers, 61
Rubber elasticity, S23
Stress relaxation, in nylon and terylene, 253
Symmetry, in crystallization and polymerization phenomena, 293
Synergistic effect, mechanism of polyvinyl chloride stabilizers, S60
Terpolymers, properties with unsaturation, 83
Terylene, effect of temperature, 271
stress relaxation, 253
Transesterification method, copolymers, 497
Transition metal catalyst, 45
Unsaturated polyesters, γ-initiated crosslinking, 303
Vinyl acetate, polymerization in aqueous media, in absence of stabilizing agents, 113
in aqueous media, in presence of low concentrations of soaps, 127
Viscoelastic absorptions, polyethylene terephthalate crystallization determined, S7
Viscose fibers, high tenacity, effect of gel particles, S5
rayon, effect of temperature, 271
